

MORPHEUS MICRO

ExHBR© (Extreme High Bit Rate)

Morpheus MICRO

ExHBR© (Extreme High Bit Rate) Player

The Morpheus Micro is a Zone Player that plays all HD Video formats in 4K@60P with HDMI 2.0 and HEVC support. It is designed for even more powerful and faster playback. It plays all content streamed to it from the Morpheus Pro, Morpheus Capture and Morpheus One including ATMOS and TrueHD 7.1 Content.

The Morpheus Micro can play 4K UHD content as a video zone extender over a gigabit ethernet network. It utilizes an ARM Quad Core processor with a fast flash memory drive running robust Linux. It's fanless and completely quiet.

The Morpheus Player is designed for the professional with easy wizard based administration and integration into major Home Automation Systems.
